rotordc Incoming! We've started to process newly arriving products in parallel to the unpacking. It all takes a bit more time as we need to develop new routines, and set up everything for the first time in the new space. Luckily, some products we had already on film from previous arrivals... we work with big firms that often have very similar furniture in more than one building in Brussels. So here they are: Office tables by Antonio Citterio for Vitra, cute stools in plywood and steel from a school, Coatstand 'Segmenti' by Michele de Lucchi & Tadao Takachi for Kartell, a couple off-white armchairs by Martin Stoll with stained beech structure, and a bunch of workshop shelves in steel that would serve equally well in a living room. As before you can check all new arrivals on our website and there's gonna be more coming in the next few days!
